

Dear friends, here are some of the **recent happenings** at Eisen|Letunic:

- We are leading one of the teams chosen to provide on-call services to local governments through **MTC's Smart Growth Technical Assistance Program**. Our first project will be to work with Strategic Economics and Freedman Tung & Sasaki to develop visualization tools for the Grand Boulevard Initiative, an effort to improve El Camino Real through San Mateo and Santa Clara counties.
- We were picked by ACTIA and ACCMA to update the **countywide pedestrian and bicycle plans for Alameda County**. We're pleased to have Alta Planning + Design and Fehr & Peers as our subconsultants on these projects.
- As part of our **on-call contract with the City of Oakland**, we've been hired to lead the City's public outreach efforts to determine enhancements to the neighborhoods impacted by the planned fourth bore of the Caldecott Tunnel.
- We were selected, as part of a team led by Fehr & Peers, to provide on-call transportation planning services for **SamTrans, Caltrain** and the **San Mateo County Transportation Authority**.
- Eisen|Letunic is turning five and we're **throwing a party to celebrate**. Save the date—Thursday, April 22—and look for an invitation sometime soon.

As always, we thank you for your continued support.

– **Victoria Eisen and Niko Letunic** (victoria@ or niko@eisenletunic.com)
